ABHIJEET KUMAR

Full-Stack Developer (MERN) | React · TypeScript · Node.js · Secure Authentication

Pune, Maharashtra, India • +91 95725 08395 • abhijeet.as1010@gmail.com • Linkedin • GitHub • Portfolio

SUMMARY

Full-stack developer building production-ready applications with React, TypeScript, Node.js, and Express.js, backed by MySQL, PostgreSQL, and SQLite. Experienced in real-time features (Socket.IO), secure authentication (JWT, bcrypt, rate limiting), and role-based access control, with a growing interest in AI/ML backed by Microsoft and AWS certifications. Shipped full-stack features as a Software Developer Intern at HashedBit Innovations. Completing an MCA at MIT World Peace University, Pune, and seeking Full-Stack Developer.

SKILLS

Languages: TypeScript, JavaScript, SQL, Python, Java

Frontend: React, TypeScript, Tailwind CSS, Vite, Chart.js, Framer Motion, HTML, CSS

Backend: Node.js, Express.js, REST APIs, Socket.IO (WebSockets), JWT Authentication, Spring Boot

Databases: MySQL, PostgreSQL, SQLite

Tools & Platforms: Git, GitHub, Postman, Vitest, ESLint, Prettier, Linux, AWS

AI Tools & ML: Cursor, GitHub Copilot, OpenAI Codex, Claude Code, Machine Learning & Deep Learning fundamentals

Concepts: Secure Authentication (bcrypt, JWT, rate limiting), RBAC, Data Structures & Algorithms, OOP, SDLC

EDUCATION

Master of Computer Applications (MCA) — MIT World Peace University, Pune *Aug 2024 – Jul 2026*

CGPA: 7.34/10

Bachelor of Computer Applications (BCA) — MIT World Peace University, Pune *Jun 2021 – May 2024*

CGPA: 8.58/10

EXPERIENCE

Software Developer Intern *Jan 2026 – Jul 2026*

HashedBit Innovations, Pune District

Project 1: meal24x7.com

- Implemented shimmer (skeleton) loading states across the blog to improve perceived performance while content loads.
- Built blog navigation to make browsing and moving between blog pages easier.
- Tested the APIs and UI routing to verify pages, links, and data flows worked correctly end to end.
- Built a reusable custom React fetch hook to centralize data fetching and avoid repeated API code.
- Improved cart UX: after an item is added, the Add to Cart button now changes to Go to Cart.

Project 2: Exam Portal

- Implemented Notice CRUD (create, read, update, delete) using the Jodit rich-text editor for formatted notices.
- Built the shared header and footer, fixed light/dark theme issues for consistent styling, and added a favicon.
- Updated the landing page and its navigation.

PROJECTS

StockFolio *React, TypeScript, Node.js, Express, Socket.IO, SQLite, Tailwind CSS*

- Rebuilt an academic Flask/MySQL project into a full-stack real-time stock portfolio tracker using React, TypeScript, and a Node/Express API, with live NSE, BSE, and US market data.

Exam Portal *Node.js, Express.js, React, MySQL*

- Built a secure candidate authentication module for an online examination platform with bcrypt-hashed credentials, account lockout after repeated failed logins, and rate-limited Express.js REST APIs.

Raspberry *React, TypeScript, Vite, Chart.js, Framer Motion, Vitest*

- Rebuilt an earlier prototype into a deployment-ready finance dashboard (React 19, strict TypeScript) for tracking income, expenses, and monthly budgets, with Chart.js visualizations, validated persistence, light/dark theming, and Vitest tests.

CERTIFICATIONS

- **Microsoft Azure AI Fundamentals (AI-900) Specialization** — Microsoft, Aug 2026
- **AWS Generative AI and AI Agents with Amazon Bedrock** — Coursera, Aug 2026
- **Foundations of AI and Machine Learning** — Microsoft, Nov 2025
- **Google IT Support** — Google, Aug 2026
